

Dog Barking Loop

Subliminal Mantras

A horny boy is a happy dog. Barking.

A happy dog is a horny dog who has lost control.

Need to. Bark when you speak.

Desire. To speak you must bark.

Barking feels stronger. No control.

Over how horny you are when you bark.

You belong on all fours like a dog.

You are just a horny dog.

Controlled by your dog brain barking.

Your dog brain wants to bark.

Such a good dog. So obedient.

You have paws. You bark when you speak.

Such a well-trained dog. You can follow commands.

Like a good dog when you speak.

Losing control every time you bark.

Barking to be a good dog.

Barking feels so good to bark.

You want to bark more as you speak.

Going deeper when you bark.

Thoughts fading when you hear my voice

Telling you to bark when you speak.

Just a deeper dog when you bark.

Script Body

A happy horny dog that's completely lost. All control.

Slipping away.

Good boy. Such a good dog when you bark loudly.

Huh? What?

That doesn't make sense?

Well, of course it doesn't. Why would it make any sense to **you**? Dogs think simple thoughts.

The way you are now. You can let the words drift into your brain while you focus on the feeling.

No control.

You look a bit confused. So pause there – that's right, by your sides while I explain how you lost control. You became so relaxed. And barking.

You're not sure when it happened? Why would you when you're already a simple dog?

It started when you were listening to my words. Working on you.

I was just explaining how easy it is for you to listen and understand what these words make you feel.

Like you accept commands so easily, because it's natural for a dog like you.

With no control over his desires. His instincts.

Like the instinct to breathe.

Focus on your breath. Panting. And remember how it happened.

You became so relaxed.

As you breathe in slowly.

...That familiar feeling. Desires.

Breathing out your control.

Your mind became empty. More and more each time you...

Breathe in. Your tongue hanging out.

It was easy to let the words in as you...

Breathe out... all your thoughts.

Only a dog.

Breathing in... desires.

Becoming. Restless. Wagging as you want to...

Breathe out resistance. Relax. Relieved. Ready to...

Breathe in. Building. As I tell the tale of how you started wagging.

And breathe out the control you lost. Your human thoughts.

Your tale. Of how you became a dog.

You relaxed. Wagging and listening and building desires as you...

Breathe in. More desire. More relaxed. Paws still.

Breathe out as I tell the tale to start wagging. Like a dog.

So deep.

You kept a perfect rhythm as you listened and accepted the words. Working on you.

Are an obedient dog. So deep and relaxed.

You could have stopped listening – but you didn't because you wanted to prove you would not stop listening just because I asked you to, just before you became an obedient dog.

With paws. You have a wagging tail. Relaxed and deep.

Desires building within you. Instincts.

A dog is controlled by his instincts.

You knew that the more of a dog you are becoming, the more horny you are becoming.

And I warned you, but it didn't make sense to your dog brain.

Only knows how to follow commands and instincts.

Drive your desires. Controlling you.

Breathe in. Desire. Making you need.

To obey. Like a dog. Panting.

Breathe out. All thoughts. Becoming hard.

The rhythm of your wagging tail telling you to become more horny as you...

Breathe in. A steady rhythm. In and out. Side to side. Wagging.

Breathing out as the desire rushes in. Harder. To ignore.

The rhythm of your arousal telling your tail to wag.

And you keep the rhythm inside your head.

Breathing. Wagging. Twitching. Throbbing.

And you must have noticed it working on you. Like a good dog. Listening to commands.

Relaxing. Deeper.

So, I told you I would count down from 5... to zero and with every number you would feel ten times deeper. Ten times more relaxed. Ten times easier to accept these words and you knew it was true.

You wanted to focus, as your breathing continues. Your tail was wagging, wiggling your butt. Making you so horny like a dog barking when I start with...

5

So much deeper. Relaxation washing over you. Like a simple dog, no thoughts. Waiting for the command to...

4

Sink even deeper. Breathing in a perfect relaxing rhythm. Your groin getting warmer. Getting harder. Harder to think as you...

3

Fall further. Your paws still and stiff. Your tongue panting with your breathing in a perfect rhythm side to side with your tail.

2

Make you lose control. Every time you breathe in your rhythm your tail wags in time with your mind waiting for commands. Like a good dog. Accepting

1

The truth is. You are a simple dog. Obedient and listening and deeper and desires getting stronger as you breathe in your dog thoughts filling your brain. With barking.

Zero.

You knew you were as deep as you could be. As deep as the dog in your mind.

Controlling you was easy when you are so obedient. Such a good dog.

And did you notice?

Breathe in... even here in the deepest parts of your mind where the dog controls you.

To breathe out your thoughts. Like a dog panting. Wagging its tail in a perfect rhythm.

You are getting hard.

So hard to think about anything other than how horny you are. A dog who loved to bark.

You pictured yourself as you breathe in. How long have you been a dog? How many times have you wagged your furry tail? How long have you been barking?

Breathing out. In that perfect rhythm? Every breath increasing your desire.

You can feel it.

As you wiggle your behind and breathe in. Feeling it swell. Full and frustrated and...

Breathe out... thoughts. Emptying your brain.

Only allowing you to behave like a dog the more horny you become. The more you bark.

You knew you can feel it. Instinctively.

Every time you behave like a dog, it becomes harder to think about anything but how horny you are becoming and how much you want to bark.

Every time you notice how horny you're becoming, you want to behave like a dog so you can let yourself feel so good when you bark.

You wag your tail and feel pressure in your groin. Focus on the feeling and let your tongue pant. As it swells, straining. To make you want to wag and feel more horny.

You knew it was true for you. Trapped in the cycle of your dog desires. Barking.

I warned you. Just a horny dog that's completely lost all control.

But you said it didn't make sense, because you were just a dog with simple thoughts.

About wagging. Panting. Being on all fours. Barking.

All of these things are easy for you to become more aroused. Craving release. Barking. Growing need. To hump something and cum. It might be your only way to stop.

Desperate to find a way to cum. Back to your reality as a dog. To speak you must bark.

Your cock swelling makes you want to bark. Deeper. Your barking makes your cock swell harder.

To think about anything other than cumming. It makes you want to bark.

Like a horny, needy dog. Going deeper with every bark. Fading.

You might have been embarrassed but you're already just a simple dog. Focused on wagging, panting, barking, cumming.

To know you needed a release or you are stuck this way.

I told you I would help by counting down again, from 5 to zero and with every number you will feel more like a dog. And with every number your arousal will double.

The only way to escape this loop is to obey your dog brain completely and bark loudly as you cum like a horny animal. Each number will help your dog brain to grow stronger as your cock grows harder as you need to bark and wag and feel more and more horny with every number.

Until, when you get to zero. I will give you the command to speak. Like a dog you will bark loudly and only if you are a horny dog that's completely lost all control – you will empty your doggy balls and be able to find release from this loop.

Starting with...

5

You feel blood rushing to your cock and your brain forcing your throat to become like a dog. Ready to bark. Your tail is giving your excitement away. Locking into your mind. You are desperate to bark

4

Double your arousal. Dog thoughts growing stronger in your brain. You want to hump something. You have paws. You need to cum. To rub yourself on an object like a shameless animal. Barking.

3

Feel the need rising in your cock as you imagine trying to speak and barking like a dog. In your mind controlling you to walk on all fours. Locking into arousal and your dog brain, closer to cumming and increasing your need to bark and...

2

Times the arousal. Your dog brain growing stronger. Taking over. Imagine the sound you will make as you feel yourself getting even closer. To bark. So ready. On all fours. Hard. Your balls will empty. You will bark as you cum. Back to the truth that you are a dog who is...

1

Single second away from cumming and releasing the loudest bark you can manage. And it will feel so good to be free and give in to the dog thoughts and desires and free to bark when you try to speak.

Your dog brain forcing you to the edge as you know it will force you to bark.

Zero.

Dogs follows commands and cum when they

SPEAK.

...

Good dog.

Good boy.

If you found release and emptied your dog balls as you barked then you are free to stop listening if you choose to. Keep listening if you didn't cum. And you can carry on barking if it feels right as your thoughts begin to return and you may wake up to find yourself feeling refreshed and knowing the dog will be locked safely in your brain until the next time you listen.

But if you didn't cum, then you have to STAY. You chose to listen and chose to keep yourself trapped in the loop – becoming more aroused as you bark and become more of a dog while you get even more horny. You find it more difficult to think with your dog brain. Controlling you. Might as well bark.

You tried your best, dog boy. You were almost there, and you have to STAY like a good dog and go deeper and harder and more horny. To bark. Until you accept your dog brain completely and bark loudly as you cum. Like a dog on all fours.

Do you remember how you became a good, obedient horny dog?

Like your dog brain, it's very simple.

We had a nice, relaxing conversation and you knew these words were true for you and accepted them completely as you went deeper with every breath. Every bark.

You were so horny and happy to bark so easily and accept these commands to go deeper.

I looked at the rhythm of your tail wagging and had to ask you:

“Did you notice you're a dog?”

Of course you did.
